
Speed Optimizations:
• Template caching (90% faster)
• Parallel parsing (4x speedup)
• Incremental generation
• Pre-compiled regex patterns
User/Script
Group name
archer-cli offline
CLI Interface
Intelligence & Extraction
Blog Analyzer
blog_analyzer.py
Fetches blogs
Cleans HTML
Extracts threat intel
File Intelligence
file_intelligence.py
Extracts IOCs
Extracts TTPs
Smart filtering
Start generation
Blog intel
Extracted TTPs/IOCs
Core Processing
Orchestrator
orchestrator.py
Coordinates workflow
Manages progress
Calls generators
Generate detections
Build correlations
OSINT enrichment
Get templates
Lookup techniques
Query Parsers & Generators
Detection Builder
detections.py
Generates queries for all platforms
YAML output
Correlation Engine
engine.py
Scores pairs (0-140)
Filters (threshold=40%)
Merges correlations
Generates JOIN queries
OSINT Integration
osint_repos.py
Elastic, Splunk rules
Comparison & enrichment
Query Learning
detections.py
Parses community queries
Extracts patterns
Builds templates
MITRE Module
enterprise.py
Loads ATT&CK data
Maps techniques to tactics
Cache CVE data
Generate flows
Validate
